

Black Berry to Black Berry Transfer Guide

Black Berry Link (Black Berry 10)

1. If your **Black Berry is not the Black Berry Priv or KeyOne**, you can transfer with **Black Berry Link**.
2. **Black Berry Link** can be downloaded through the Black Berry App Store.
3. Once Downloaded, open the app and choose which files you would like to sync.
4. You will need to download **Black Berry Link** on your new **Black Berry**, which will allow content to transfer to the new device. ****Please Note that the transfer can take multiple hours to complete, depending on the amount of content on the original device****

****You can also download Black Berry Link on your Computer to share Files, Media, & Other Content****

****Please Note that all Black Berry Phones can be accessed through a computer by simply plugging in a USB Data Cable. Once the phone is plugged in, you may drag files from your phones storage directly onto your computer without additional programs****

Black Berry Content Transfer (Priv & Key One)

1. If your **Black Berry** is either the Priv or KeyOne, you will need to use Black Berry Content Transfer to move your content over to your new device.
2. You will first need to download (if not downloaded already) **Black Berry Content Transfer** from the **Black Berry App Store**.
3. Once downloaded, you may choose which files you would like to send from your original device to the new device.
4. Once both phones have **Black Berry Content Transfer** open you will be prompted to pair the phones with a pin number provided upon pairing.
5. Once paired, the content will begin to transfer. ****Please Note that the transfer of many large files could take multiple hours to complete****

****Please Note that all Black Berry Phones can be accessed through a computer by simply plugging in a USB Data Cable. Once the phone is plugged in, you may drag files from your phones storage directly onto your computer without additional programs****
