

## Samsung to Samsung Transfer Guide

*Samsung to Samsung Transfer can be completed through Samsung's Smart Switch App, which will allow you to transfer content directly from your old device to your new one.*

1. First step is to verify that your old **Samsung Device** is above **Android Version 4.0**. If so, you can download **Samsung Smart Switch**, if not already downloaded, from the **Google Play Store**.
2. Once download you can begin the initial set up of your new Samsung Device. **\*\*Please note that the content transfer should be done AFTER your new Samsung Device has been initialized on a network with a SIM Card. Doing so prior to connecting to your network will result in your phone being reset to factory default settings\*\***
3. Continue with the initial set up on your new **Samsung Device** until you reach the last prompt for **Content Transfer**. On this page you will have the option to select **Samsung Smart Switch** (the program comes automatically downloaded on your new **Samsung Device**).
4. Follow the prompts to connect the old and new devices, then select the content you wish to transfer. **\*\*Please note: the transfer process can take multiple hours. Please insure that both devices do not run out of power during the transfer process. You may also want to set your old device to Airplane Mode to prevent any interruptions.\*\***
